

Sweet Peppers

***DAYS TO MATURITY**

Sweet Pepper varieties have been selected for their mild flavor and thick walls. Set plants out when weather is warm, spaced 1½-2' apart. Fertilize once or twice after established, before blossoms set. Pick sweet peppers when they have reached a good size. Most types can be picked green or fully ripe. Flavor sweetens as fruit ripens.

Use row covers in September or bring indoors to lengthen the season.

NAME	FRUIT	*DTM
Alma Paprika	2" round, thick walled peppers with sweet flavor and a hint of warmth. Turns from creamy white, to orange, then to red. HEIRLOOM	80
