

# ATTENTION

**Euphorbia 'Tasmanian Tiger' is toxic when ingested.**

We recently became aware that the vendor's plant description on our quart-sized **Euphorbia 'Tasmanian Tiger'**, sold for \$7.99, has been improperly labeled as having "Attractive & Edible Evergreen Foliage". Though they are attractive and evergreen, **please note all parts of Euphorbias are toxic when ingested.** The plants were sold at both locations from October 1, 2012 to present. We have notified our vendor and the problem has been corrected.

We apologize for this error. **Please do not eat any part of this plant.** If you have questions or concerns please ask. Thank you.
